

# FABRICATION SOLUTIONS

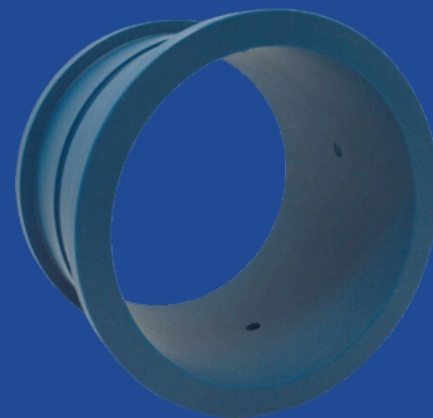

## Quick Turn Arounds

Get your products fast! Our extensive machinery and skilled workforce ensure nimble manufacturing. With branches nationwide, we guarantee quick delivery and maintain a large inventory to minimize lead times. For key partners, we create custom production schedules to ensure timely readiness of parts.

## Complex Demands

Our CNC production capabilities handle intricate parts with speed and accuracy. We use the latest technology to cut, drill, bend, shape, laser etch, and paint plastics. You'll be amazed at what we can do.

## Barrier to Growth

In-house fabrication challenges slowing you down? Our extensive CNC machining equipment and focus on automation enable faster part production. Struggling with volume fluctuations? We have solutions. Let us be your partner to overcome growing pains and manage overflow or seasonal demands.

## Material Selection

Not sure which material suits your application? Our plastics experts can guide you on material behavior in various conditions and ask the right questions to find your perfect match. Plus, our online material selector aids in your research.

## Documentation & Compliance

Cope Plastics maintains ISO 9001:2015 compliance and an in-house Quality Program. We provide all necessary quality or testing documents. Our employee training ensures ongoing compliance and high performance. Cope is a Certified Women Owned Company and is ITAR Certified.

## Quality

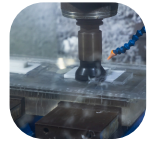

Our documented Quality Management System ensures our parts meet expectations. We keep records on each run to track down root causes and provide Corrective Action Reports if needed. In the rare case you receive substandard parts, your replacement order is prioritized to provide quick and hassle-free replacements.

# Our Equipment Capabilities

## Routers

For large parts and large quantities, nothing beats our multi-head CNC routers. We're equipped with over a dozen of these massive machines allowing us to handle any size project.

## Mills

From simple to complex specifications and from small to large quantities, our vertical and horizontal mills get the job done with top notch precision.

## Lathes

Manual and automatic lathes can produce any round work that can be made from rod—washers, pulleys, valves, grommets, and a whole lot more.

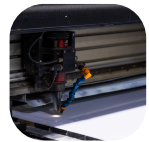

## Screw Machines

Screw machining is an excellent alternative to injection molding, especially considering the high cost of tooling.

## Saws

For both cut-to-size and cut-for-fabrication jobs, these machines execute large and small cuts quickly and accurately.

## Lasers

Our state-of-the-art laser capabilities allow us to engrave and cut with unparalleled accuracy, ensuring your projects are executed to perfection.

## Custom Fabrication

Each detail is meticulously handcrafted to match your vision. From oven forming to fritting, painting, edge finishing, flame polishing, etc. we offer a diverse range of solutions tailored to your needs.

At Cope Plastics, we have a team of experienced fabricators and nationwide fabrication capabilities. Our technical experts and cutting-edge tools are equipped to handle all your plastic fabrication needs and bring your project to life! Solving problems is what we do best, so bring us your challenges and we will help you leverage them into competitive advantages for your business.
