

Our Quality Program

We're passionate about delivering quality and excellence in distribution and fabrication for our partners, every time.

At Cope Plastics, quality is no accident. We've developed our regulatory and compliance program to help ensure that you, our plastics fabrication and distribution customers, continue to receive the quality materials you've come to expect.

In addition to our regulatory and compliance program, which is administered by trained team members, Cope Plastics has also maintained ISO certification since 1999. In June 2018, our fabrication facilities in Alton, IL and Hiawatha, IA obtained ISO 9001:2015 certification, the latest standard in quality assurance. We undergo ISO audits every year to demonstrate our commitment to serving you with the best quality materials and service.

Our Cope Plastics Quality Policy

Cope Plastics, Inc is committed to quality in every process within our organization. Quality is essential to our Quality Management System (QMS) and is ingrained in the strategic direction of our company. Our processes, policies and procedures ensure our customers receive quality products made to their requirements. Cope Plastics, Inc.'s comprehensive focus on quality and continual improvement creates mutually-beneficial partnerships both internally and externally. Cope will consider regulatory and statutory requirements as well as our interested parties.
